## Iroko

Iroko is an African hardwood that will gradually beautify with age to a striking silver-grey patina. When the wood is new it expresses a variety of warmer tones.

Timber components come treated with ProNature ([www.pronature.co.za](http://www.pronature.co.za)) outdoor oil. The oil seals and protects the timber against minor stains and nourishes the timber to preventing drying out when exposed to the outdoor elements. In time, hairline cracking will appear, due to the timber drying out. This surface cracking is natural, not a defect, and will not affect the structural integrity of the furniture.

Care for your timber components by maintaining them with ProNature oil. The frequency of maintenance required will depend on the level of exposure to the outdoor elements. Lightly sand the furniture with a 180 grit sand paper and re-apply the ProNature oil according to the instructions on the tin.
